

Reference Sheet for Teachers and Families

A spelling adventure for third graders that plays in a web browser.

Free | No ads | No accounts

What it is

A browser game where third graders practice spelling inside a space-themed amusement park at night. Players rescue chickens that a living flamingo pool float has scattered across the park, and nearly every action runs on spelling.

What players practice

Spelling of 285 built-in third-grade words in five levels, from short vowels and blends to tricky high-frequency words, all in American English with practice sentences. Teachers can load a class spelling list instead. Connects to Common Core L.3.2.e and L.3.2.f.

How it works

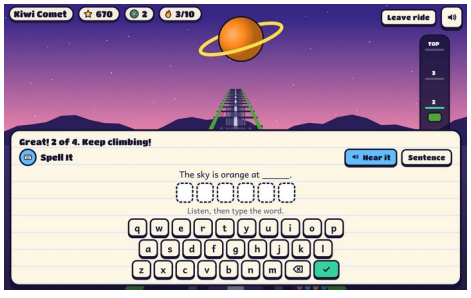

The game says each word, reads a sentence, and says the word again. Players spell it four ways: typing (Spell It), Letter Tiles, Fill It In, and Pick It. Correct words climb roller coaster hills, win carnival games, feed space animals, and power up silly attacks. Missed words get a second try with letter hints, then the correct spelling, and they come back later for practice.

Play the game

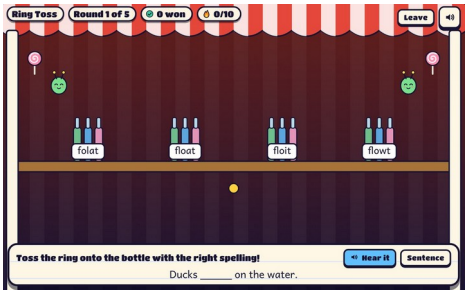

cluck-quest-2.netlify.app

Scan with a phone or iPad camera, or type the address into a web browser.

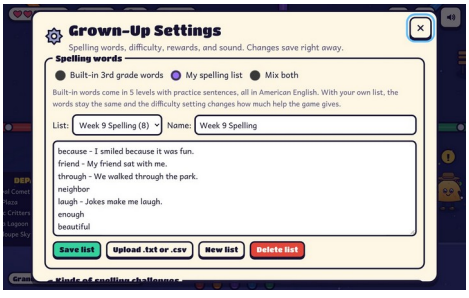

Grade	Third grade, about ages 8 to 9	**Devices**	iPad, Chromebook, or computer browser
Reading	All words and sentences read aloud	**Saving**	Automatic, on the device only
Cost	Free, with no ads or purchases	**Timers**	None
Settings	Word list, challenge types, difficulty, sound	**Progress**	Report with words to practice

Spell words to climb the coaster hill.

Carnival games use spelling.

Load a class spelling list.

Good to know

Privacy: no accounts, ads, chat, outside links, or data collection. Progress stays in the browser on that device. **Content:** cartoon battles with silly attacks, including a little potty humor (Magic Fart, Thunder Burp). The rides use first-person motion, and the game shows brief bright flashes for ride photos and fireworks. Grown-Up Settings are not password protected.
